

INSTRUCTIONS

Mini fridge & food warmer

YOUR MINI FRIDGE WILL OPERATE FROM EITHER 12 VOLT D.C. OR A.C. POWER ADAPTOR

Your MINI FRIDGE is supplied with a power cord to fit either a car, boat, van or RV cigarette lighter socket or our optional A.C. adaptor for home use. **Never attempt to connect directly to A.C. without this adaptor.** Just plug into either supply and plug the other end of the cord into your MINI FRIDGE. **Never cut cord or reverse wires.** This would damage your MINI FRIDGE (See inside for other connection details)

Plug your MINI FRIDGE into power source and switch to hot or cold as desired. Light should illuminate as shown. **If no lights are on**, no power is coming through — check connections.

If low battery light is on, your battery needs charging or connections are bad.

If wrong light is on, i.e. hot, when switched to cold, unplug it **IMMEDIATELY**. This means the power is reversed and it will damage your MINI FRIDGE. Check that the connections in your vehicle are correct and that the system is 12 volt D.C. negative ground and not positive ground.

TECHNICAL SPECIFICATIONS

	Exterior Dimensions		Interior Dimensions	
Length	16 inches	41 cm	11½ inches	29 cm
Height	11 inches	28 cm	8 inches	20 cm
Width	11½ inches	29 cm	8 inches	20 cm
Capacity	0.4 cu. ft. 10.5 litres			
Weight	10 lbs. 4.5 kg.			

Voltage: 12 volts D.C. 10% residual A.C. ripple maximum allowable.
Current: 3.8 amps nominal +/- 10% for cooling. Heating will be less.

Maximum heat pump capacity: 120 B.T.U.

Temperature Control: thermistors, linear I.C., low power transistor, diodes.

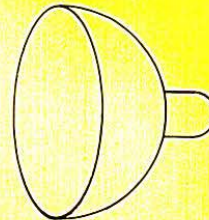

Indicators: Light emitting diodes for hot, cold and low battery.

Accessories provided: one 6ft. (2 metre) power cord.

Optional extra: 12 volt D.C. adaptor

Battery consumption: Although your MINI FRIDGE draws approximately 4.0 amps and the average car battery is rated at 60 amp/hours, it is a good idea not to operate your MINI FRIDGE for more than 3 to 5 hours without running your car for a short time to ensure your battery is in good condition. If the battery runs down in this time then you may have a faulty battery or car generator. This is quite common so have them checked to avoid any inconvenience. Of course you may use your MINI FRIDGE continuously while the car is running since the generator provides more than enough power.

Your MINI FRIDGE power drain is approximately equal to one car headlight

The Ideal A.C. Power Adaptor specially designed for your

MINI FRIDGE AND FOOD WARMER

Now you can take your MINI FRIDGE with you and use it in ...

**Motel rooms, Patios, Rec. Rooms,
 Beside your pool, Cottages,
 Locker rooms, Construction sites,
 As a bar fridge ...**

Anywhere there's house current available.

THE A.C. POWER ADAPTOR HAS A CIGARETTE LIGHTER RECEPTACLE SIMILAR TO YOUR CAR, VAN OR R.V.
 SO EASY TO OPERATE! SIMPLY PLUG THE POWER CORD THAT COMES WITH YOUR UNIT, FROM YOUR MINI FRIDGE CONTROL PANEL INTO THE ADAPTOR'S LIGHTER RECEPTACLE, THEN PLUG THE POWER ADAPTOR INTO THE A.C. OUTLET.
